

Induction II (Capizzi)			
Drug	Route	Dose	Days
Cytarabine (Ara-C)	IV infusion over 3 hours (2 doses per day)	100 mg/kg/dose for patients < 36 months of age	1, 2, 8, 9
		3000 mg/m ² /dose for patients > 36 months of age	
L-Asparaginase <i>E. coli</i> (LASP)	IM	200 units/kg/dose for patients < 36 months of age	2, 9
		6000 units/m ² /dose for patients > 36 months of age	2, 9

Intensification I and II			
Drug	Route	Dose*	Days
Cytarabine (Ara-C)	Continuous IV infusion X 7 days (168 hours)	3.3 mg/kg/24 hours for patients < 36 months of age	1 through 7 continuously
		100 mg/m ² /24 hours for patients > 36 months of age	
Etoposide (ETOP)	IV infusion over 1 hour	4.2 mg/kg/dose for patients < 36 months of age	1, 2, 3
		125 mg/m ² /dose for patients > 36 months of age	

Induction I, III and IV		
Drug	Route	Dose*
Cytarabine (Ara-C) <i>over 24h</i>	Continuous IV infusion for 96 hours	6.67 mg/kg/24 hours for patients < 36 months of age 200 mg/m ² /24 hours for patients > 36 months of age
Damogran (DNK) <i>idoxo</i>	Continuous IV infusion for 96 hours <i>every hrs</i>	0.67 mg/kg/24 hours for patients < 36 months of age mg/m ² /24 hours for patients > 36 months of age
Thioguanine (TG) <i>6 mp</i>	PO	1.65 mg/kg/dose <u>twice</u> daily for patients < 36 months of age 50 mg/m ² /dose twice daily for patients > 36 months of age

Intrathecal Ara-c (Induction I and III)		
Intrathecal Cytarabine (IT Ara-C)	Intrathecal (IT)	20 mg (age 0 to < 13 months) 30 mg (age 13 to < 25 months) 50 mg (age 25 to < 36 months) 70 mg (age > 36 months)
