

Haematological recovery to ANC $>0.75 \times 10^9/L$ and platelets $>75 \times 10^9/L$ should be ensured prior to each Day 1 of each 21 day cycle.

Table 12 Group F PLADO+S Treatment Cycle Schedule

Group F	Day 1	Day 2	Days 3-21	Day 22
PLADO + Sorafenib	Cisplatin $80\text{mg}/\text{m}^2$ as an IV infusion over 6 hours			Day 1 of next cycle
	Doxorubicin $30\text{mg}/\text{m}^2$ as an IV infusion over 15 minutes – 6 hours	Doxorubicin $30\text{mg}/\text{m}^2$ as an IV infusion IV over 15 minutes – 6 hours		
			Sorafenib $150\text{mg}/\text{m}^2$ twice daily orally*	

For patients with body weight $<10\text{kg}$ the following doses should be used instead of those quoted above:

- Cisplatin $2.7\text{mg}/\text{kg}$
- Doxorubicin $1\text{mg}/\text{kg}$

*Refer to Table 14 for details of Sorafenib dosing

PLADO + Sorafenib / GEMOX + Sorafenib
